## INTRODUCTION

This list of subject headings has been compiled to facilitate the work of indexers and to increase the usefulness to subscribers of the General Subjects section of the International Index to Television Periodicals. Consistency and clarity in the choice of headings is essential when indexing or retrieving periodical articles.

The headings are arranged in alphabetical order, with indications of relationships between the terms, and references from non-preferred terms. The conventional abbreviations are used i.e.:

UF = used for  
BT = broader term  
NT = narrower term  
RT = related term

This present publication is the 4th edition and follows the practice introduced in the latest collection of subject headings for the film service. The number of corporate bodies included in recent years has been threatening to overwhelm the "real" subject headings, and they are now listed separately. In addition the broader terms of these corporate bodies are also given a section to themselves which will further help to avoid confusion, and will serve as an index to the corporate bodies. e.g.

### Corporate bodies

FEDERAL COMMUNICATIONS COMMISSION  
UF: F.C.C.  
BT: Organizations. USA

### Subject/country listing of corporate bodies

ORGANIZATIONS. USA  
NT: Federal Communications Commission

This edition has been input on computer and typeset at the Danish Filmmuseum, under the supervision of Karen Jones. As a result future editions will be much easier to produce and should appear with greater frequency (funds allowing!).
